RS Technical Services Inc.
Design and Manufacture of Video Pipeline Inspection Systems

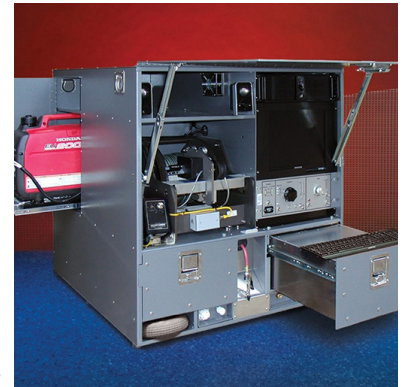

conductor THE SINGLE SOLUTION

The CUBE

It only looks square.

As we move into what some are fond of calling "construction season," CCTV pipeline inspection contractors are gearing up for another busy one. Long, hot days can be made less taxing with equipment specialized for some of the more demanding, less flexible workspaces you need to navigate on some projects.

No doubt, one of the more challenging of such workspaces is the road easement, island or boulevard that offers little in the way of extra room for a truck-mounted, main line televising system. We have just thing to help you make quick work of those places while still getting all the information you need with a minimum of hassle.

We introduced The CUBE a few years ago, in response to the need for a powerful, feature-rich package with all the power of a full main line system in a free-standing, highly mobile format. But don't let its compact, boxy look fool you: This agile dynamo will quickly surprise you with its progressive performance!

Housed in quarter-inch, powder-coated, glare-resistant aluminum, this little workhorse has forklift access both front and rear along with four 2000 lb. rated lift/tie down hooks. The system has been configured to be highly water resistant from design of all the doors and panels all the way to the sealed rivets.

- Can be configured to operate a mainline system with up to 1,500 ft. of cable
- Rack mount or laptop data collection system
- MPEG video recording capability
- Fully self-contained with on-board generator
- Two 500 lb. capacity storage drawers
- Front access, 9-gallon pressurized wash-down system
- Fits on an ATV or in the bed of a pickup truck

Your Authorized Dealer is:

Municipal Equipment Sales, Inc.

Mailing Address: PO Box 1233
Location: 208 Bell Place
Woodstock, GA 30188

Local: 770-928-0424
